WORK EXPERIENCE

Technical Anchor
SUBEX

08/2021 - Present

Tasks

- Development of **SpringBoot** Application with Hibernate and REST End points in Microservice architecture.
- Developing new/additional features in the project depending on client's requirements like Ageing, row-level security, TOTP login.
- Implemented Object Based Access, that provides precise access control for users and groups using **KAFKA**.
- Created logging micro-service that captures API and event logs using **ElasticSearch**.
- Multi-Language support using Transloco library for **Angular** UI.
- Implemented TOTP verification as 2nd factor Authentication using **Keycloak**.
- Integrated Prometheus and Grafana for performance metrics.
- Implemented **TrinoGateway** for routing queries to Trino Cluster.
- Supporting and Troubleshooting over 5+ Production site.
- Improved query performance for table view using caching tables.

Intern
XON Labs

Tasks

- Using Twitter API to fetch tweets, likes and reposts related to particular hashtag for a period in realtime.
- Used advanced Google RNN model for Sentiment analysis of Tweets and provide the results.

EDUCATION

SJB Institute of Technology
Banglore,Karnataka

05/2017 - Present   7.8

BE

- Computer Science

SKILLS

JAVA   SpringBoot   Docker

Kubernetes   Postgres   Hibernate

Trino   TrinoGateway   Hive   S3

minio   ElasticSearch   Kafka   Druid

Keycloak   Jenkins   Gitlab   Angular

Python   Grafana   Prometheus

PROJECTS

Rock-Paper-Scissor
- It takes images through webcam and tells the hand symbol.
- TensorFlowJS, HTML

FB Phishing page
- A database project using using SQL,Bootstrap and JS for responsive web page.
- PHP, HTML, CSS
